PROJECTS

Fictional Character Website

Built a responsive website using HTML, CSS, and JavaScript to showcase profiles of fictional characters with images, background info, and interactive features like filtering and collapsible sections.

Pizza Bill Generator (Using Java)

Developed a Java application to generate pizza bills with options for size, toppings, and add-ons using object-oriented programming and user input handling

Myntra Clone Website

Designed and developed a responsive e-commerce front-end clone of the Myntra website using HTML, CSS, and JavaScript. Implemented product listings, navigation menus, search bar, and interactive UI elements to simulate real shopping experience.
